

Automated Trading Expert and President of Strategy Runner, Dr. Anna Becker, Selects Trade Angle Strategies for Personal Investments

Dr. Anna Becker, President and founder of Strategy Runner, is a well-known trading industry expert who over the last 10 years has created her own database of professional trading systems—the best of the best. She sees them come and go through her Strategy Exchange and recently decided she couldn't watch a good thing get away—and she put her own money into Trade Angle's TAS SP Daily auto system. On Strategy Exchange I see the world's best trading strategies. After tracking John's trading results for the last few years, I can say that this company (Trade Angle) has its act together. They have provided by way of factual evidence to me, and other clients of Strategy Runner, a consistently profitable trading system. TAS SP Daily has delivered 500% over three years of consistent running time on the Strategy Runner servers. According to Anna, *"TAS SP Daily is one of the best auto trading systems I have ever seen. It is a long-term strategy that has performed well for our client base. I wanted to enjoy the same returns as our TAS SP Daily clients so I decided to jump on board with the rest of them. I am not disappointed to say the least"*

And that's no small decision since Anna Becker has hundreds of auto trade systems to choose from. Yet, she chose one of Trade Angle Strategies' (TAS) top auto trade performers, the TAS SP Daily as a personal investment due to its consistent and stellar performance. In a brief conversation with TAS CEO, John Logan, she complimented TAS and their investment methodology with the TAS SP Daily, in particular its long-standing track record of consistent gains with well managed risk.

Strategy Runner

Strategy Runner Ltd. (www.StrategyRunner.com) was founded in 1999 and provides automated trading solutions for active traders. Strategy Runner offers its platform complete with its charting package, analytics tools, system development and trade simulation. Trade Angle Strategies

Trade Angle Strategies LLC (TAS) is a systems developer of Automated Systems and Analytical Tools. Our unique proprietary tools and algorithms take advantage of markets in trending patterns or in range bound modes. Formerly a CBOT and CME member proprietary trading firm,

TAS now primarily focuses on automated trading signals in the major US Indices, US Treasury Bonds, Gold, and Grains as well as FOREX programs.

Trade Angle offers confidently, thru years of hard work, strategies that have continually been ranked in the top 10 automated trading strategies in the world. Their unique way of organizing data, and the analysis of that data, has proven to be a winning combination across all markets, and across all types of market conditions.

In most strategies out there, having high market volatility or low market volatility usually predicates how a system is going to perform short term and long term. Trade Angle has taken the opposite approach.....why should you have to be subject to having certain market conditions to succeed and be profitable? The answer is you shouldn't. Trade Angle uses dynamic forecasting tools and VIX (volatility numbers) in their analysis process to gauge for example how they adjust profit targets, relax stops, and employ their gaming theory techniques. These dynamic changes ensure that your money is not sitting there waiting for certain market conditions to arise to be a winner. And Trade Angle also puts the odds in your favor to not suffer thru losers unnecessarily. Systems that think for their self and change parameters on their own is the ultimate goal of any strategy.

Trade Angle also set out to be a leader in educating and developing successful self-traders in the Futures markets. What do we mean by successful? The top 5-10% of all successful traders in the world! Our TAS Trading Tools are second to none when it comes to giving traders an edge. Trade Angle gives the trader the ability to know where the commercials and institutions are in the markets, and how to trade on their side, AND NOT AGAINST THEM!
